WHAT IS PMC?

Permanent Modular Construction is completed in an environmentally-controlled factory rather than onsite, reducing facility construction time from months to weeks. Site preparation occurs at the same time, but now with fewer construction hazards and maximum safety and security. The pre-built modular units are then assembled onsite.

Whether quick-service, fast-casual, or general hospitality, Kitchens To Go can help design and build your operation to help you achieve greater speed to market. **Contact KTG today at (888) 212-8011.**

We Keep You Cooking!™

ADVANTAGE OF PMC

///

Streamlined construction process (faster than conventional construction).

///

Resource efficient—less labor and fewer materials wasted.

///

Reduced environmental impact—less site damage, less material exposure and less waste in landfill.
