by mobile modular

We Keep You Cooking!™

### CLIENT

La Valencia Hotel

### THE NEED

To maintain foodservice production during main kitchen renovations.

### THE SOLUTION

A modular, customizable cooking complex with four units, set up in the hotel parking lot.

## PROJECT INFORMATION

La Valencia Hotel utilized Kitchen To Go's modular cooking facilities during their main kitchen renovations.

A historic landmark in La Jolla, California, La Valencia posed unique challenges that required a flexible, customized solution. To meet these needs, Kitchens To Go connected four modular units, creating a fully functional cooking complex in the hotel's parking lot.

This setup mirrored the functionality of La Valencia's own kitchen, allowing the hotel to continue operations seamlessly with no interruption of service.
