

VIRTUA MEMORIAL HOSPITAL

Kitchen Renovation Space

KITCHENS TO GO[®]
by mobile modular

We Keep You Cooking!™

CLIENT

Virtua Memorial Hospital is a 433-bed facility in Mt. Holly, NJ, that specializes in Internal Medicine and General Surgeries.

THE NEED

To provide uninterrupted foodservice to patients, visitors, and staff during the 12 month renovation and construction

THE SOLUTION

A four unit modular kitchen complex with four cold storage units.

PROJECT INFORMATION

Virtua Memorial reached out to Kitchens To Go for support during a 12-month renovation and construction project that would shut down its kitchen production space. After determining the foodservice capacity necessary to serve all patients, visitors and staff, KTG designed, assembled and installed a four-unit modular kitchen complex in an unutilized space immediately adjacent to the facility, with additional cold units attached to each of the four modules for additional storage. The modular complex fully supported all of Virtua Memorial's foodservice needs during the entirety of the year-long project, ensuring no interruption of service.
