We Keep You Cooking!™

## PROJECT INFORMATION

Castle Hill Inn located in Newport, Rhode Island, was established in 1875. The Inn oversees the East Passage and the Atlantic, which has secured its varied and notable history. Kitchens To Go's solution was a modular, full plate-service kitchen that doubled the size of the existing kitchen facilities.

The new facility was installed and operational in 120 days and features a charcuterie station and mise en place prep area. Factory installed kitchen equipment includes: customized stainless-steel counters with heating elements, grease separator, hoods, kitchen floors, wall covering and ceilings designed for commercial kitchen use.

## QUICK FACTS

- Building constructed in quality-controlled factory; site preparation occurred simultaneously – 120 days from project start to finish.
- 100% of the equipment was factory installed.
- Minimal disruption to existing business.

## CLIENT

Castle Hill Inn, located in Newport, RI.

## THE NEED

To significantly increase food service for a secondary building and outdoor dining area available for catering weddings and other large events. The building's exterior also needed to blend with the classical architecture of the inn.

## THE SOLUTION

A Permanent Modular Solution consisting of cook and prep space was installed to expand dining offerings, thus creating The Lawn at Castle Hill.
