

MERCER UNIVERSITY

Modular Kitchen Supports Campus During Renovation

KITCHENS TO GO®
by mobile modular

We Keep You Cooking!™

CLIENT

Mercer University - Macon, GA

THE NEED

Temporary kitchen solution to support meal service throughout an 18-month renovation.

THE SOLUTION

Three-module cook, prep, and wash kitchen with connected cooler, freezer, dry storage, and restroom.

PROJECT INFORMATION

Mercer University, a private research university in Macon, Georgia, needed a temporary kitchen solution to maintain consistent student meal service during an 18-month renovation. Kitchens To Go by Mobile Modular provided a three-module, Georgia state-approved modular kitchen with dedicated cook, prep, and wash areas, along with connected cooler, freezer, dry storage, and restroom modules. The 2,016-square-foot facility also included humidity and climate control to support efficient daily operations.

Speed and coordination were key to the project. The agreement was signed in March 2026, and the modular kitchen was delivered approximately three months later in June. Regular communication between Kitchens To Go and Mercer University helped keep project requirements aligned and supported a smooth transition from planning through delivery.

Planned to remain on campus for 18 months, the modular kitchen provides a practical solution for maintaining consistent meal service throughout the renovation. The project demonstrates Kitchens To Go's ability to deliver flexible, state-approved modular kitchen solutions for higher education environments where speed, coordination, and continuity are critical.
